Biofertiliser workshop: Boost your soil health

Tuesday 8 December | 9 am - 4:30 pm | 1118 Jabuk South Road, Jabuk (steel horses outside)

Join the Murraylands and Riverland Landscape Board and David Hardwick from Soil Land Food to learn about the process of making 3 different types of biofertilisers.

Biofertilisers are an effective and affordable way to boost plant and soil health and can be easily manufactured on-farm to suit enterprise scale. Find out how to tailor your own biofertiliser to address the constraints of your soils.

Participants will receive resources to take home. Attendance is free, including lunch, and registrations are essential.

Please bring a chair, a bottle of water and a hat if the weather is hot for the seated session.
Register before 30 November.
